

I writing to you in an attempt to protect my radio station Air1 who uses a FM translator to feed their signal to my area. Without Air1 my family and I would not have christian programming and music that we enjoy. Other christian programs in our area are too contemporary and, excuse me for saying, boring. Allowing these other low power FM stations to have priority in our area could mean the loss of out station and the end of our radio listening.

Thank you for consideration in this matter. God Bless.
